PROJECTS

College Student Approval & Placement Website – PHP, MySQL, HTML, CSS, JavaScript

July 2023 – Aug 2023

- Developed a dynamic platform for colleges to manage student approvals and placement records.
- Implemented role-based authentication for students and administrators.
- Admins can post placement notices, job opportunities, and event updates.
- Students can submit approval requests, view placement updates, and download offer letters.
- Designed a responsive front-end with user-friendly navigation.
- Ensured secure data handling with form validation and SQL injection protection.

Toy Website with Admin Panel – PHP, MySQL, HTML, CSS, JavaScript
Jan 2024 – Feb 2024

- Created an e-commerce website for toy products with an integrated admin panel.
- Admins can add, update, and remove products, manage categories, and track inventory.
- Integrated search and filter features for better user experience.
- Designed a responsive shopping cart system with order summary and checkout.
- Ensured secure login and session management for both admin and users.
- Focused on UI/UX design for smooth and engaging online shopping experience.
